## **Amendments to Claims:**

This listing of claims will replace all prior versions and listings of claims in the instant application:

## What is claimed is:

1. (Currently Amended) A method for configuring Transmission Control Protocol/Internet Protocol (TCP/IP) settings on a computer having only a non-graphical user interface for manually manipulating TCP/IP configuration <u>flat</u> files, the method comprising the steps of:

providing a graphical user interface for configuring the TCP/IP settings including at least one control;

integrating the graphical user interface with the non-graphical user interface;

accessing data contained within at least one configuration <u>flat</u> file containing the TCP/IP settings for said computer;

displaying the TCP/IP settings based upon said accessed data within said graphical user interface; and

altering one or more of said TCP/IP settings within said at least one configuration flat file responsive to manipulation of said at least one control.

- 2. (Previously Presented) The method of claim 1, wherein said graphical user interface is configured for at least one of a 32-bit multiple virtual storage operating system and a 64-bit multiple virtual storage operating system.
- 3. (Cancelled)
- 4. (Previously Presented) The method of claim 1, further comprising the step of: integrating said graphical user interface with an interface component of an

U.S. Patent Appln. No. 10/667,740 Amendment Dated July 11, 2008 Reply to Office Action of May 30, 2008 Docket No. BOC9-2003-0028 (397)

operating system of said computer.

- 5. (Previously Presented) The method of claim 1, further comprising the step of: displaying help relating to configuring TCP/IP communication settings of said computer within said graphic user interface.
- 6. (Currently Amended) The method of claim 1, further comprising the steps of:

providing a selection list within said graphical user interface, said selection list including a multitude of user-selectable settings for at least one configuration parameter of said configuration <u>flat</u> file; and

updating said configuration parameter responsive to a selection within said selection list.

- 7. (Currently Amended) The method of claim 1, further comprising the step of: synchronizing multiple ones of said at least one configuration <u>flat</u> file using said graphical user interface.
- 8. (Currently Amended) The method of claim 1, further comprising the step of: checking a validity of at least one parameter stored within said configuration <u>flat</u> file using said graphical user interface.

9-22. (Cancelled).
